PM CONTROL TOWER — Training Program

> *Version 3.1.0 · Training pack for the Enterprise Project, Program & Portfolio Management Platform (Portfolio → Program → Project → WBS → Schedule → EVM → Governance → Leadership Reporting).*

What this pack is

A facilitator-ready curriculum for training any audience — executives, PMO staff, project managers, finance controllers and delivery team members — on the PM Control Tower. Every module maps to real screens, real buttons and real data in the application. Nothing here is conceptual: if it is written down, you can click it.

The documents

#	Document	Audience	Time
01	Platform Orientation	Everyone	20 min
02	Executive Control Tower	Executives, PMO	30 min
03	Plan the Work	PMs, planners	45 min
04	Execute & Collaborate	Team leads, members	30 min
05	Control Performance	PMs, finance, PMO	45 min
06	Intelligence & Reporting	Executives, PMO	30 min
07	Automations & Administration	Admins, PMO	30 min
08	Hands-On Workshop	Mixed groups	90 min
09	FAQ & Quick Reference	Everyone	Keep handy

Learning paths by role

Executive (COO, sponsor) — 01 → 02 → 06 → 08 (station A)
Learn to read the Control Tower, drill into any number, and consume the Leadership bundle in weekly governance.

PMO administrator — all modules
Owns the platform end to end: data model, governance queues, automations, reporting templates, user administration.

Project / Program manager — 01 → 03 → 05 → 04 → 08 (station B)
Plans the project (WBS, schedule, baseline), controls it (EVM, RAID, changes, gates) and leads the team through execution.

Finance controller — 01 → 05 (financials + EVM) → 06
Budgets, actuals, forecasts, billing and cost performance.

Team member — 01 → 04 → 08 (station C)
Boards, own tasks, timesheets, work inbox.

Auditor — 01 → 05 (governance, integrity) → 07 (audit trail)
Read-only oversight with a complete, immutable evidence trail.

Suggested formats

- **2-hour overview workshop** — modules 01, 02, 03 (live demo), 08 stations.
- **Half-day deep dive** — all modules with hands-on exercises in each.
- **Role-based onboarding** — one learning path above, one-to-one or small group.

Facilitator setup (10 minutes before)

1. Start the platform (`start.bat` on Windows, or `npm run dev`) and open `http://localhost:3000`.
2. Log in as the persona you will demo: `pmo@pmct.io` / `Pmct@2026` (PMO Administrator, sees everything). All seeded users share this password.
3. Open the **Executive Control Tower** (`#/dashboard`) — this is the home screen for executives and PMO.
4. Optional: run the automation scan (**Connect** → **Control Automations** → **Scan now**) so the automations module shows fresh execution history.
5. Optional: **Intelligence** → **Reporting Center** already ships with 177 published report templates across 13 categories — browse by category during module 06.

Golden rules to repeat in every session

1. **Every number has a source.** No figure on any dashboard is decorative — click it and it drills into the operational record that produced it.
2. **Plan → Execute → Monitor → Control → Govern → Deliver.** The platform mirrors this loop; data flows forward automatically.
3. **The Integrity Layer is the trust contract.** Freshness scores tell you whether the data behind a decision is current — check them before acting.
4. **Governance is embedded, not bolted on.** Stage gates, change control, approvals and audit trail are part of the daily flow, not a separate system.
